INDEX TO SUBJECTS

A

Actinomycin D, inhibition of DNA dependence of plastid differentiation, in protozoan *Euglena gracilis*, 296

Antigens, localization of in eggs and developmental stages of sea urchin *Paracentrotus lividus*, biochemical and immunological study, 307

Anuran, *Xenopus*, ultrastructural changes in regressing tail muscles of larvae at metamorphosis, 481

Autoradiography, for electron microscopy, a procedure for improving resolution and sensitivity and contrast, 469

Azo dye 2-Me-DAB, morphological changes induced in rat liver cells by, light and EM study, 143

B

Bacteria, *Acetobacter xylinum*, and corn coleoptiles, dimensions of cellulose microfibrils, EM study, 302

—, *Diplococcus pneumoniae*, fine structure of, 453

— (green), strains of *Chlorobium*, fine structure of, 207

Bacterial (*E. coli*) and artificial DNA plasms, studies on fixation of for electron microscopy of thin sections, 1

Bean, *Phaseolus vulgaris*, early stages in development of plastid fine structure in etiolated leaves in red and far-red light, EM study, 433

—, *Phaseolus vulgaris*, fine structural changes in proplastids of etiolated leaves during photodestruction of pigments, EM study, 443

Beef, heart muscle, effect of sonic oscillation on structure and function of mitochondria, EM and biochemical study, 49

—, heart muscle, macromolecular repeating unit of mitochondrial structure and function, correlated EM and biochemical studies of isolated mitochondria and submitochondrial particles, 63

Bone, of chick embryo, origin of lathyritic collagen and its morphologic state in, autoradiographic study of experimental lathyrism, 623

C

Calcification, metastatic, at cellular level in proximal convoluted tubules of rat kidney, studied by EM and electron diffraction and histochemical methods, 189

Calcium depletion, effects of on junctional complex between oxyntic cells, of gastric glands of frog *Rana pipiens*, EM study, 173

Cell division and DNA labeling, in so called "nondividing tissues" of mouse, autoradiographic study, 21

Cell, germ, in mouse testis, ribonucleic acid synthesis during development (mitosis and meiosis) of, autoradiographic study, 521

—, HeLa, effects of puromycin on nucleoproteins of, cytochemical and biochemical study, 493

— junction, epithelial (salivary gland), modifications of surface membrane permeability at, in larvae of fruitfly *Drosophila flavorepleta*, 565

— junction, epithelial (salivary gland), surface structure at, in larvae of fruitfly *Drosophila flavorepleta*, EM study, 587

Cells, erythroid, of rabbit, alterations in polyribosomes during cell maturation, quantitative analysis of distribution, EM study, 599

—, erythroid, of rabbit, mathematical correction of polyribosome distributions as observed in cell sections by EM, 613

—, fibroblast lines, in mouse, analysis of *in vitro* synthesis and secretion of collagen by, EM study, 227

—, hepatoma, of rat liver, induced by carcinogen (3′Me-DAB), replication time and pattern in, autoradiographic study, 341

—, intestinal, of rat, filaments (fibrils) in microvillous border of, EM study, 701

—, liver, of rat, morphological changes induced by azo dye 2-Me-DAB, light and EM study, 143

—, lutein, of rat, effects of hypophysectomy and mammotrophic hormone, fine structural study, 127

—, of nematode *Caenorhabditis briggsae* reared in axenic culture, incorporation of tritiated thymidine into DNA of, autoradiographic study, 281

—, oxyntic, of gastric glands of frog *Rana pipiens*, effects of calcium depletion on junctional complex between, EM study, 173

—, Paneth, mature and differentiating, especially with relation to endoplasmic reticulum and lysosomes, of rat intestine, EM study, 633

—, photoreceptor, in pineal organs (frontal organ and epiphysis), in frog *Rana pipiens*, fine structure of, EM and cytochemical study, 653

—, synovial lining of rabbit, uptake of iron dextran following intra-articular injection, light and EM study, 351

Cellular changes, in erythrocytes of salamanders *Triturus cristatus* and *Amphiuma tridactylum*, during fixation with osmium tetroxide solutions, EM study, 551

Cellulose microfibrils, dimensions of in corn coleoptiles and *Acetobacter xylinum*, EM study, 302

Cerebellum, of mouse, differentiation of neuronal types and synapses in myelinating cultures, studied with Holmes silver impregnation method, 259

Chick, embryo, origin of lathyritic collagen and its

morphologic state in bone, autoradiographic study of experimental lathyrism, 623
Chicks, *in vitro* culture of muscle tissue from normal and heterozygous and dystrophic animals, biochemical and microscopic study, 391
Chromosome aberrations, induced by 8-ethoxycaffeine, in cultured human leucocytes, 291
Collagen, analysis of *in vitro* synthesis and secretion of in established mouse fibroblast lines, EM study, 227
— formation and wound healing, in guinea pig, distortion of ribosomal patterns of fibroblasts in scurvy and following recovery, EM and autoradiographic and histochemical study, 365
—, lathyritic, in chick embryo, origin of and morphologic state in bone, autoradiographic study of experimental lathyrism, 623
Corn, coleoptiles of, and *Acetobacter xylinum*, dimensions of cellulose microfibrils, EM study, 302
Cricket, *Acheta domestica*, fine structure of flagella of spermatids of, 710
Crustacean, ostracod *Cypridopsis vidua*, new configuration of sarcoplasmic reticulum, in appendicular muscles, EM study, 477
Culture, of muscle tissue, from normal and heterozygous and dystrophic chicks, biochemical and microscopic study, 391
Cytochrome oxidase, distribution of activity in rat liver brei fractionated in zonal ultracentrifuge, biochemical studies on isolated cell components, 317

D

DNA dependence of plastid differentiation, in protozoan *Euglena gracilis*, inhibition by actinomycin D, 296
— labeling and cell division, in so called "non-dividing tissues" of mouse, autoradiographic study, 21
—, of cells of nematode *Caenorhabditis briggsae* reared in axenic culture, incorporation of tritiated thymidine into, autoradiographic study, 281
— plasms, artificial and bacterial (*E. coli*), studies on fixation of for electron microscopy of thin sections, 1
— synthesis, cytoplasmic, in *Amoeba proteus*, studies on nature of DNA-containing elements, autoradiographic study, 505

E

Eggs and developmental stages of sea urchin *Paracentrotus lividus*, localization of antigens in, biochemical and immunological study, 307
Electron microscopy, freeze-drying of biological specimens for by thermoelectric cooling, 293
— microscopy, improved method of staining for, 697
— microscopy, new Maraglas-D.E.R.® 732 embedment for, 704
— microscopy of thin sections of artificial and bacterial (*E. coli*) DNA plasms, studies on fixation for, 1
— microscopy, procedure for improving resolution and sensitivity and contrast for autoradiography, 469
Embedding, for electron microscopy, new Maraglas-D.E.R.® 732 embedment, 704
Embryo, of chick, origin of lathyritic collagen and its morphologic state in bone, autoradiographic study of experimental lathyrism, 623
Enzyme, cytochrome oxidase, distribution of activity in rat liver brei fractionated in zonal ultracentrifuge, biochemical studies on isolated cell components, 317
—, lactic dehydrogenase, localization of in white skeletal muscle of rabbit, cytochemical study, 29
Enzymes, malic dehydrogenase and beta-glucuronidase, solubilization of during mitochondrial swelling and disruption of lysosomes by streptolysin S and other hemolytic agents, of rabbit liver, biochemical studies on lysosomes, 101
Epithelial (salivary gland) cell junction, modifications of surface membrane permeability at, in larvae of fruitfly *Drosophila flavorepleta*, 565
Epithelium (salivary gland), surface structure of, particularly at cell junction, in larvae of fruitfly *Drosophila flavorepleta*, EM study, 587
—, sensory, of macula utriculi in labyrinth of fish *Lota vulgaris*, with special reference to directional interplay of sensory responses as revealed by morphological polarization, EM study, 413
Erythrocytes, of salamanders *Triturus cristatus* and *Amphiuma tridactylum*, measurements of some cellular changes during fixation with osmium tetroxide solutions, EM study, 551
Erythroid cells, of rabbit, alterations in polyribosomes during cell maturation, quantitative analysis of distribution, EM study, 599
— cells, of rabbit, mathematical correction of polyribosome distributions as observed in cell sections by EM, 613

F

Feulgen cytophotometry, off-peak absorption measurements in, mathematical justification of validity, using nuclei of human anterior pituitary gland, 515
Fibers, muscle, of fish (*Molliensis* sp.), sarcolemmal invaginations constituting T system in, EM study, 675
Fibrils (filaments), in microvillous border of intestinal cells of rat, EM study, 701
Fibroblast lines, in mouse, analysis of *in vitro* synthesis and secretion of collagen by, EM study, 227
Fibroblasts, distortion of ribosomal patterns of in scurvy and following recovery, wound healing and collagen formation, in guinea pig, EM and autoradiographic and histochemical study, 365
Fish, black mollie (*Molliensis* sp.), sarcolemmal invaginations constituting T system in muscle fibers, EM study, 675
—, *Lota vulgaris*, structure of sensory epithelium of macula utriculi in labyrinth of, with special reference to directional interplay of sensory responses as revealed by morphological polarization, EM study, 413
Fixation, for electron microscopy, freeze-drying of biological specimens by thermoelectric cooling, 293

Fixation, of artificial and bacterial (*E. coli*) DNA plasms, for electron microscopy of thin sections, 1
— with osmium tetroxide solutions, measurements of some cellular changes in erythrocytes during, of salamanders *Triturus cristatus* and *Amphiuma tridactylum*, EM study, 551
Flagella, of spermatids of cricket *Acheta domestica*, fine structure of, 710
Freeze-drying, of biological specimens for electron microscopy, by thermoelectric cooling, 293
Frog, *Rana pipiens*, effects of calcium depletion on junctional complex between oxyntic cells of gastric glands, EM study, 173
—, *Rana pipiens*, fine structure of pineal organs (frontal organ and epiphysis), EM and cytochemical study, 653
Fruitfly larvae, *Drosophila flavorepleta*, modifications of surface membrane permeability at epithelial (salivary gland) cell junction, 565
—, larvae, *Drosophila flavorepleta*, surface structure of epithelium (salivary gland), particularly at cell junction, EM study, 587

G

Gastric glands, of frog *Rana pipiens*, effects of calcium depletion on junctional complex between oxyntic cells of, EM study, 173
Germ cell, in mouse testis, ribonucleic acid synthesis during development (mitosis and meiosis) of, autoradiographic study, 521
Granules, isolated from rabbit peritoneal leucocytes, effects of streptolysins and other hemolytic agents on, biochemical studies on lysosomes, 115
Grasshopper, *Chortophaga viridifasciata*, evidence for cytoplasmic synthesis of nuclear histone during spermiogenesis, cytochemical and autoradiographic study, 327
Guinea pig, wound healing and collagen formation, distortion of ribosomal patterns of fibroblasts in scurvy and following recovery, EM and autoradiographic and histochemical study, 365

H

Hair, cortex of in rat, incorporation and fate of tyrosine-H^3 in, radioautographic study, 403
Heart muscle, of beef, effect of sonic oscillation on structure and function of mitochondria, EM and biochemical study, 49
— muscle, of beef, macromolecular repeating unit of mitochondrial structure and function, correlated EM and biochemical studies of isolated mitochondria and submitochondrial particles, 63
— muscle (ventricular), normal and glycerinated, of toad *Bufo marinus*, some observations on fine structure and metabolic activity (enzymatic) of, EM and cytochemical study, 533
HeLa cell, effects of puromycin on nucleoproteins of, cytochemical and biochemical study, 493
Hepatoma cells, of rat liver, induced by carcinogen (3′Me-DAB), replication time and pattern in, autoradiographic study, 341
Histone, nuclear, evidence for cytoplasmic synthesis of during spermiogenesis, in grasshopper *Chortophaga viridifasciata*, cytochemical and autoradiographic study, 327
Human, anterior pituitary gland nuclei, off-peak absorption measurements in Feulgen cytophotometry, mathematical justification of validity, 515
—, cultured leucocytes, chromosome aberrations induced by 8-ethoxycaffeine, 291

I

Intestine, of rat, filaments (fibrils) in microvillous border of cells of, EM study, 701
—, of rat, mature and differentiating Paneth cells of, especially with relation to endoplasmic reticulum and lysosomes, EM study, 633
Iron dextran, uptake of by synovial tissue following intra-articular injection, in rabbit, light and EM study, 351

K

Kidney, of rat, metastatic calcification at cellular level in proximal convoluted tubules, studied by EM and electron diffraction and histochemical methods, 189

L

Labyrinth, sensory epithelium of macula utriculi of in fish *Lota vulgaris*, with special reference to directional interplay of sensory responses as revealed by morphological polarization, EM study, 413
Lactic dehydrogenase, localization of in white skeletal muscle of rabbit, cytochemical study, 29
Larvae, of anuran *Xenopus*, ultrastructural changes in regressing tail muscles at metamorphosis, 481
—, of fruitfly *Drosophila flavorepleta*, modifications of surface membrane permeability at epithelial (salivary gland) cell junction, 565
—, of fruitfly *Drosophila flavorepleta*, surface structure of epithelium (salivary gland), particularly at cell junction, EM study, 587
Lathyritic collagen, origin of and morphologic state in bone, of chick embryo, autoradiographic study of experimental lathyrism, 623
Leaves, etiolated, of bean *Phaseolus vulgaris*, early stages in development of plastid fine structure in red and far-red light, EM study, 433
—, etiolated, of bean *Phaseolus vulgaris*, fine structural changes in proplastids of during photodestruction of pigments, EM study, 443
Leucocytes, cultured, of human, chromosome aberrations induced by 8-ethoxycaffeine, 291
—, peritoneal, of rabbit, effects of streptolysins and other hemolytic agents on isolated granules of, biochemical studies on lysosomes, 115
Liver cells, of rat, morphological changes induced by azo dye 2-Me-DAB, light and EM study, 143
—, of rabbit, solubilization of enzymes during mitochondrial swelling and disruption of lysosomes by streptolysin S and other hemolytic agents, biochemical studies on lysosomes, 101
—, of rat, distribution of cytochrome oxidase activity in brei fractionated in zonal ultracentrifuge, biochemical studies on isolated cell components, 317

Liver, of rat, replication time and pattern of carcinogen (3′Me-DAB)-induced hepatoma cells, autoradiographic study, 341
Lutein cells, of rat, effects of hypophysectomy and mammotrophic hormone, fine structural study, 127
Lysosomes, biochemical studies on, effects of streptolysins and other hemolytic agents on granules isolated from rabbit peritoneal leucocytes, 115
—, of rabbit liver, solubilization of enzymes during mitochondrial swelling and disruption of lysosomes by streptolysin S and other hemolytic agents, biochemical study, 101

M

Macula utriculi, in labyrinth, of fish *Lota vulgaris*, structure of sensory epithelium of with special reference to directional interplay of sensory responses as revealed by morphological polarization, EM study, 413
Membrane, cell surface, modifications of permeability at epithelial (salivary gland) cell junction, in larvae of fruitfly *Drosophila flavorepleta*, 565
—, cell surface, of epithelium (salivary gland), particularly at cell junction, in larvae of fruitfly *Drosophila flavorepleta*, EM study, 587
— systems, intracytoplasmic, and plasma membrane, of bacteria *Diplococcus pneumoniae*, EM study, 453
Metamorphosis, of anuran *Xenopus* larvae, ultrastructural changes in tail muscles during, 481
Microfibrils, cellulose, dimensions of in corn coleoptiles and *Acetobacter xylinum*, EM study, 302
Microvilli of intestinal cells, of rat, filaments (fibrils) in, EM study, 701
Mitochondria, effect of sonic oscillation on structure and function of in beef heart muscle, EM and biochemical study, 49
Mitochondrial structure and function, macromolecular repeating unit of in beef heart muscle, correlated EM and biochemical studies of isolated mitochondria and submitochondrial particles, 63
Mitotic apparatus (spindles), isolation of from eggs of clam *Spisula solidissima*, 488
Mollusc, clam *Spisula solidissima*, isolation of mitotic apparatus (spindles) from eggs of, 488
Mouse, cerebellum, differentiation of neuronal types and synapses in myelinating cultures, studied with Holmes silver impregnation method, 259
—, established fibroblast lines, analysis of *in vitro* synthesis and secretion of collagen by, EM study, 227
—, testis, ribonucleic acid synthesis during germ cell development (mitosis and meiosis), autoradiographic study, 521
—, tissues, labeling of DNA and cell division in so called "non-dividing tissues," autoradiographic study, 21
Muscle, appendicular, of ostracod *Cypridopsis vidua*, new configuration of sarcoplasmic reticulum of, EM study, 477
— fibers, of fish (*Molliensis* sp.), sarcolemmal invaginations constituting T system in, EM study, 675
Muscle, heart, of beef, effect of sonic oscillation on structure and function of mitochondria, EM and biochemical study, 49
—, heart, of beef, macromolecular repeating unit of mitochondrial structure and function, correlated EM and biochemical studies of isolated mitochondria and submitochondrial particles, 63
— tissue, *in vitro* culture of from normal and heterozygous and dystrophic chicks, biochemical and microscopic study, 391
—, ventricular, normal and glycerinated, of toad *Bufo marinus*, some observations on fine structure and metabolic activity (enzymatic) of, EM and cytochemical study, 533
—, white skeletal, of rabbit, localization of lactic dehydrogenase, cytochemical study, 29
Muscles, tail, regressing, of anuran *Xenopus* larvae at metamorphosis, ultrastructural changes in, 481
Myelin breakdown, during Wallerian degeneration of peripheral nerve of rabbit, tubular arrays derived from, EM study, 715

N

Nematode, *Caenorhabditis briggsae*, reared in axenic culture, incorporation of tritiated thymidine into DNA of cells of, autoradiographic study, 281
Nerve, peripheral, of rabbit, tubular arrays derived from myelin breakdown during Wallerian degeneration, EM study, 715
Neuronal types and synapses, differentiation of in myelinating cultures of mouse cerebellum studied with Holmes silver impregnation method, 259
Nuclear histone, evidence for cytoplasmic synthesis of during spermiogenesis, in grasshopper *Chortophaga viridifasciata*, cytochemical and autoradiographic study, 327
Nuclei, of human anterior pituitary gland, off-peak absorption measurements in Feulgen cytophotometry, mathematical justification of validity, 515
Nucleoproteins, of HeLa cell, effects of puromycin on, cytochemical and biochemical study, 493

O

Oxyntic cells, in gastric glands of frog *Rana pipiens*, effects of calcium depletion on junctional complex between, EM study, 173

P

Paneth cells, mature and differentiating, especially with relation to endoplasmic reticulum and lysosomes, of rat intestine, EM study, 633
Photoreceptor cells, of pineal organs (frontal organ and epiphysis), in frog *Rana pipiens*, fine structure of, EM and cytochemical study, 653
Photosynthetic green bacteria, strains of *Chlorobium*, fine structure of, 207
Pineal organs (frontal organ and epiphysis) in frog *Rana pipiens*, fine structure of, EM and cytochemical study, 653
Pituitary gland, anterior, of human, nuclei of, off-peak absorption measurements in Feulgen cytophotometry, mathematical justification of validity, 515

Plastid differentiation, in protozoan *Euglena gracilis*. DNA dependence of, inhibition by actinomycin D, 296
Plastids, of etiolated leaves of bean *Phaseolus vulgaris*, early stages in development of fine structure of in red and far-red light, EM study, 433
Polyribosome dissociation, derived from EM data, kinetic analysis of, 611
— distributions, as observed in cell sections by EM, of rabbit erythroid cells, mathematical correction of, 613
Polyribosomes, of erythroid cells, of rabbit, alterations in during cell maturation, quantitative analysis of distribution, EM study, 599
Proplastids, of etiolated leaves of bean *Phaseolus vulgaris*, fine structural changes of during photodestruction of pigments, EM study, 443
Protozoan, *Amoeba proteus*, cytoplasmic DNA synthesis, studies on nature of DNA-containing elements, autoradiographic study, 505
—, *Euglena gracilis*, DNA dependence of plastid differentiation, inhibition by actinomycin D, 296
Puromycin, effects of on nucleoproteins of HeLa cell, cytochemical and biochemical study, 493

R

Rabbit, erythroid cells, alterations in polyribosomes during cell maturation, quantitative analysis of distribution, EM study, 599
—, erythroid cells, mathematical correction of polyribosome distribution as observed in cell sections by EM, 613
—, liver, solubilization of enzymes during mitochondrial swelling and disruption of lysosomes by streptolysin S and other hemolytic agents, biochemical studies on lysosomes, 101
—, peripheral nerve, tubular arrays derived from myelin breakdown during Wallerian degeneration, EM study, 715
—, peritoneal leucocytes, effects of streptolysins and other hemolytic agents on isolated granules of, biochemical studies on lysosomes, 115
—, synovial tissue, uptake of iron dextran following intra-articular injection, light and EM study, 351
—, white skeletal muscle, localization of lactic dehydrogenase, cytochemical study, 29
Radioactive label, proline-H^3 and glycine-C^{14} and tritiated beta-aminopropionitrile, origin of lathyritic collagen and its morphologic state in bone, of chick embryo, autoradiographic study, 623
— label, thymidine-H^3, cytidine-H^3, and arginine-H^3, evidence for cytoplasmic synthesis of nuclear histone during spermiogenesis in grasshopper *Chortophaga viridifasciata*, cytochemical and autoradiographic study, 327
— label, thymidine-H^3, cytoplasmic DNA synthesis in *Amoeba proteus*, studies on DNA-containing elements, autoradiographic study, 505
— label, thymidine-H^3, incorporation of into DNA of cells of nematode *Caenorhabditis briggsae* reared in axenic culture, autoradiographic study, 281
Radioactive label, thymidine-H^3, labeling of DNA and cell division in so called "non-dividing tissues" of mouse, autoradiographic study, 21
— label, thymidine-H^3, procedure for improving resolution and sensitivity and contrast for autoradiography with EM, 469
— label, thymidine-H^3, replication time and pattern of carcinogen(3′Me-DAB)-induced hepatoma cells, of rat liver, autoradiographic study, 341
— label, tyrosine-H^3, incorporation and fate of in hair cortex of rat, radioautographic study, 403
— label, uridine-H^3 or cytidine-H^3, ribonucleic acid synthesis during germ cell development (mitosis and meiosis), in mouse testis, autoradiographic study, 529
Rat, hair, incorporation and fate of tyrosine-H^3 in cortex of, radioautographic study, 403
—, intestine, filaments (fibrils) in microvillous border of cells of, EM study, 701
—, intestine, mature and differentiating Paneth cells of, especially with relation to endoplasmic reticulum and lysosomes, EM study, 633
—, kidney, metastatic calcification at cellular level in proximal convoluted tubules, studied by EM and electron diffraction and histochemical methods, 189
— liver cells, morphological changes induced by azo dye 2-Me-DAB, light and EM study, 143
—, liver, distribution of cytochrome oxidase activity in brei fractionated in zonal ultracentrifuge, biochemical studies on isolated cell components, 317
—, liver, replication time and pattern of carcinogen (3′Me-DAB)-induced hepatoma cells, autoradiographic study, 341
—, lutein cells, effects of hypophysectomy and mammotrophic hormone, fine structural study, 127
Renal calcification, metastatic, at cellular level in proximal convoluted tubules of rat kidney, studied by EM and electron diffraction and histochemical methods, 189
Ribosomal patterns, distortion of in fibroblasts in scurvy and following recovery, wound healing and collagen formation, in guinea pig, EM and autoradiographic and histochemical study, 365
RNA, synthesis of during germ cell development (mitosis and meiosis), in mouse testis, autoradiographic study, 521

S

Salamanders, *Triturus cristatus* and *Amphiuma tridactylum*, measurements of some cellular changes during fixation of erythrocytes with osmium tetroxide solutions, EM study, 551
Sarcolemmal invaginations, constituting T system in muscle fibers, of fish (*Molliensis* sp.), EM study, 675
Sarcoplasmic reticulum, new configuration of in appendicular muscle of ostracod *Cypridopsis vidua*, EM study, 477
Sea urchin, *Paracentrotus lividus*, localization of antigens in eggs and developmental stages of, biochemical and immunological study, 307

Spermatids, of cricket *Acheta domestica*, fine structure of flagella of, 710
Spermiogenesis, in grasshopper *Chortophaga viridifasciata*, evidence for cytoplasmic synthesis of nuclear histone during, cytochemical and autoradiographic study, 327
Spindles (mitotic apparatus), isolation of from eggs of clam *Spisula solidissima*, 488
Staining, for electron microscopy, improved method of, 697
Synapses and neuronal types, differentiation of in myelinating cultures of mouse cerebellum, studied with Holmes silver impregnation method, 259
Synovial tissue, of rabbit, uptake of iron dextran following intra-articular injection, light and EM study, 351

T

Testis, of mouse, ribonucleic acid synthesis during germ cell development (mitosis and meiosis), autoradiographic study, 521
Tissue culture, of muscle from normal and heterozygous and dystrophic chicks, biochemical and microscopic study, 391
Toad, *Bufo marinus*, some observations on fine structure and metabolic activity (enzymatic) of normal and glycerinated ventricular muscle, EM and cytochemical study, 533
Tubular arrays, derived from myelin breakdown during Wallerian degeneration, of peripheral nerve of rabbit, EM study, 715

W

Wallerian degeneration, of peripheral nerve of rabbit, tubular arrays derived from myelin breakdown during, EM study, 715
Wound healing and collagen formation, in guinea pig, distortion of ribosomal patterns of fibroblasts in scurvy and following recovery, EM and autoradiographic and histochemical study, 365
